

Why Buy Your Microsoft Licensing

We know you have choices when buying software – but our services provide value other resellers do not. Here are the benefits you can expect when buying Microsoft licensing from us.

- 1. We handle all Microsoft licensing moves, adds, and changes on your behalf.** We obtain licensing from the distributor and assign the licenses to your users within your company's Microsoft tenant – with minimum wait time.
- 2. We assume responsibility for all license purchasing.** We have a dedicated team to manage all purchasing, so you never miss a cancelation window or incur unnecessary recurring costs.
- 3. Consolidated billing and streamlined vendor management.** Microsoft licensing purchased through us means one less vendor to manage and one less invoice to reconcile every month.
- 4. Tenants with licensing purchased through us benefit from industry best practices and added security.** We have a dedicated O365 team that creates proactive processes – like rules, scripting, and access policies – and carries out incident response when issues arise.
- 5. Advanced technical support.** We will work with the software distributor – and engage Microsoft directly, if needed – to resolve advanced issues when they arise.
