IT Management and Security for Nonprofits

Providing you with technology that supports your valuable work

Your game-changing vision and vital work that benefits the community should be backed up by technology and an IT support team that bolsters your efforts. Our team of IT specialists view serving the tech-related needs of nonprofits in local communities as an important part of our work. We believe in the power of positive change as demonstrated by those nonprofits. Your network, computers, mobile devices, and cloud assets are critical to your operations. Our team wants to design a custom IT support plan just for you.

Technology support designed for a busy nonprofit

- **24x7 advanced performance monitoring:** Caring for the health, security, and functionality of your critical network and cloud assets.

- **Scheduled preventive maintenance:** Keeping your servers, PCs, and other vital network devices functioning optimally, improving reliability and security.

- **Backup management:** Harnessing industry best practices to keep your environment and essential business data secure, protected, and available.

- **Workflow optimization:** Optimizing your network by identifying, reporting, and resolving issues in real time.

- **Unlimited remote support:** Giving you and your staff access to our technicians for IT answers and timely troubleshooting.

The right IT partner and the right IT approach: Dependability and no surprises.

It's crucial to have an IT partner that can support your mission and help you innovate IT solutions to make your work more streamlined and secure. Our team works with nonprofits every day to deliver comprehensive, proactive IT maintenance and support within a budgeted monthly subscription payment. We make IT support easy, predictable, and affordable for nonprofits.

Our plans come with all the security, support, maintenance, and troubleshooting you need, within an easily budgeted, monthly subscription format. That means no more big, surprise IT repair bills that take valuable resources away from the good work you are trying to do.

The benefits of a comprehensive, proactive approach to your organization's IT support

- A consistent, monthly IT support expense
- A single point of contact for all your technology needs
- An economical technology support solution that you can scale
- Answers and support for your employees' day-to-day IT questions
- Confidence in your cybersecurity management, monitoring, and posture
- Consulting to deliver mobile and innovative IT options
- Mitigation of unplanned downtime risk
- Proactive IT maintenance to keep your operations up and running

Enterprise-grade security within reach of a nonprofit's budget

Your databases contain both personal and confidential information on donors, clients, and projects. We help protect that data by delivering cybersecurity measures built for much larger organizations – but budgeted and tailored to yours.

- 24/7/365 cybersecurity monitoring
- Cybersecurity incident response
- Patching and security updates
- Endpoint security

- Mobile device security
- Email security
- Secure data backups
- Enterprise-class antivirus and firewall management
